
Claims

What I claim as my invention is:

1. A method of manufacturing a composition suitable for treatment to protect against hair loss on a human scalp, the composition having the following constituents, by percentage of liquid volume of total ingredients:
 - a) water, from 0.005% to 99.5%,
 - b) Sodium diisopropylnaphthalene sulfonate, from 0.005% to 99.5%,
 - c) Butylene glycol, from 0.005% to 50%,
 - d) N-acyl LED3A, from 0.005% to 30%,
 - e) Hamposyl M-30, from 0.005% to 30%,
 - f) Hamposyl TC Glutamate, from 0.005% to 30%.
2. A method of treatment;
 - a) apply the topical solution to the scalp one time daily;
 - b) in an amount from 1 to 3 milliliters,
 - c) massaging into the scalp for 1 minute,
 - d) rinsing off with water after 1 minute,
 - e) apply for no less than 90 days.
